PROJECT OVERVIEW

The City of Davis Wastewater Treatment Plant Rehabilitation and Replacement Project consisted of rehabilitation of the headworks including new influent pumps, bar screens, steel pipe repair, and concrete repair. It also consisted of rehabilitation of grit tanks and sedimentation basins including new chain and flights, new grit piping, concrete repair, and new coatings. A new sludge mixer was installed in the digester tank and the tank interior was coated.

SERVICES PROVIDED

ICM Group, Inc. provided construction management, inspection, and document control services. Our services included inspection of construction materials and methods, monthly updates for City managers, change order review and processing, claims mitigation, processing RFIs and submittals, and progress payments.
