Overaa

### PROJECT OVERVIEW

The Manteca WQCF Phase III, Schedule C, Solids Handling Facility Project consists of construction of new sludge dewatering building, sludge blending tank, and maintenance building, as well as the installation of two high solids sludge centrifuges. The project includes conveyors, odor control biofilter facilities, pumps, generators, valves, and vaults.

### SERVICES PROVIDED

ICM is providing bid support, constructability review, construction management, inspection, document control, materials testing, specialty inspection, and startup services. Our services include inspection of construction materials and methods, coordination with the treatment plant personnel, monthly updates for City managers, change order review and processing, claims mitigation, partnering, processing RFIs and submittals, and progress payments.
