

Carson Crossing Drive Developer Project

Project Data

Owner:
El Dorado Irrigation District

Project Type:
Pipelines

Project Duration:
2015-2016

Inspection:
ICM Group, Inc.

Designer:
CTA Engineers, Inc.

Contractor:
Veerkamp Engineering, Inc.

PROJECT OVERVIEW

The project consisted of the installation of sewer and water pipelines. The sewer pipelines consisted of 2 inch ARV pipe and 8 inch C900 sewer force main. Manholes, coated with hypox, were installed. The water pipelines consisted of 8 inch and 12 inch C900 water pipe. Work included cleaning, flushing, and testing of all lines. Potable lines were disinfected and tested. Excavation depths were as deep as 35 feet.

SERVICES PROVIDED

ICM Group provided inspection services for El Dorado Irrigation District. Services included inspection of construction materials and methods, coordination and updates for City's construction manager and review of change orders and progress payments.
