

Moose Hall Pump Station Rehabilitation Project El Dorado Irrigation District

PROJECT DATA

Owner:
El Dorado Irrigation District

Project Type:
Water

Project Duration:
2015

Construction Value:
\$589,981

Inspection:
ICM Group, Inc.

Designer:
Domenichelli & Assoc.

Contractor:
Syblon Reid

Project Overview

This project consisted of the demolition and reconstruction of a 2,800 gpm water pump station providing water to several communities in El Dorado Irrigation District's service area. Improvements included demolition of existing pump house structure, new suspended slab over pump vault, new pump house, electrical upgrades, installation of three 200 hp pumps, and improvements to the clearwell.

Services Provided

ICM provided inspection services which included ensuring the pump station could resume service within a 24 hour period in the event of an emergency. Other services provided also include inspection construction, verifying work quality, preparation of daily reports and photos, and review of change orders and progress payments.
