RE Smith

PROJECT OVERVIEW

The Groveland Community Services District Water Treatment Plant Disinfection Modifications consists of upgrading and expanding two separate facilities, Second Garrotte and Big Creek. Each facility includes construction of UV disinfection buildings, installation of 2.1 mgd UV systems, aqueous ammonia tanks and chemical metering pumps, chlorine contact tanks, and SCADA.

SERVICES PROVIDED

ICM provided construction management and inspection services. Our services included inspection of construction materials and methods, monthly updates for the District, change order review, claims mitigation, progress payments, and meeting minutes.
