

Hinkle Reservoir Outage Temporary Tank Project

Project Data

Owner:
San Juan Water District

Project Type:
Water Tank

Project Duration:
2020

Construction Value:
\$1 Million

CM / Inspection:
ICM Group, Inc.

Designer:
HDR, Inc.

Contractor:
CST Industries, Inc.

PROJECT OVERVIEW

The Project consisted of the construction of two 1-million-gallon bolted steel tanks and appurtenances connected to a 100MGD water treatment plant. Appurtenances included piping connections, instrumentation, mixers and ports for future chlorine injection.

SERVICES PROVIDED

ICM Group provided construction management, inspection, and document control services. Our services included inspection of construction materials and methods, change order review and processing, claims mitigation, processing RFIs and submittals, and progress payments.
